Edj[®] Pendant

Designed & Manufactured in the UK

www.hacel.co.uk

Edj Pendant by Hacer Lighting – a masterpiece in minimalist design and advanced illumination technology, meticulously crafted to elevate modern architectural spaces.

Every detail has been carefully considered to create a luminaire that feels effortless in appearance yet exceptional in performance.

With its ultra-slim profile, transparent edge-lit optics and beautifully balanced illumination, Edj transforms everyday lighting into a refined architectural feature, delivering elegant visual comfort without compromising on efficiency or functionality.

Designed to Disappear

Great lighting should enhance spaces, not dominate them. With its slim profile and clean architectural silhouette, Edj has been designed to blend seamlessly into contemporary interiors, creating a striking visual effect without demanding attention.

When unlit, the light guide wings appear transparent, resulting in a luminaire that feels almost invisible when not in use, enhancing both architectural and commercial spaces.

24mm

Available in two lengths, 600mm and 1200mm, the Edj Pendant offers the flexibility to complement a wide range of architectural and commercial applications.

Whether creating a refined lighting feature above a boardroom table, defining collaborative workspaces, or making a statement within reception and breakout areas, Edj can be specified to suit the scale and character of the space.

Its elegant proportions and consistent minimalist form ensure visual continuity across both sizes, enabling cohesive lighting schemes throughout a building.

Designed for modern architectural environments, Edj allows designers to maintain a unified design across diverse spaces while responding to the functional and aesthetic requirements of each setting.

From focused workspaces and meeting rooms through to larger open-plan areas, Edj adapts effortlessly, delivering a consistent balance of design clarity, visual comfort and performance.

Intelligence, Illuminated

For those seeking advanced control solutions, the Edj Pendant is compatible with Casambi-enabled Smart Lighting Controls, offering seamless integration into modern intelligent building systems.

From simple dimming and scene setting to daylight harvesting, occupancy control and scheduled lighting, Edj can be tailored to suit the evolving needs of any space. Intuitive controls allow lighting schemes to be easily configured, adjusted and expanded, making future changes both straightforward and cost-effective.

By combining intelligent lighting control with the exceptional efficiency of the Edj Pendant, users can create comfortable, responsive environments that enhance occupant wellbeing while reducing energy consumption and supporting long-term sustainability goals.

Balanced Light for Better Spaces

The Edj Pendant utilises advanced edge-lit optic technology, combining direct and indirect illumination in a carefully considered 60:40 distribution.

This design not only provides balanced illumination but also ensures visual comfort with a Unified Glare Rating (UGR) of less than 19 across all outputs, making it ideal for professional settings where optimal lighting is paramount.

Bespoke as Standard

Hacel Lighting takes pride in manufacturing luminaires to order, offering a “Bespoke as Standard” service that gives clients the flexibility to specify and configure their ideal lighting solution.

With over 1,000 possible configurations available for Edj, we ensure that every luminaire is tailored to meet the precise requirements of any project.

This approach allows specifiers, designers, and consultants to achieve the perfect balance of performance, aesthetics, and energy efficiency without compromising on choice.
